

1. Which are the top three variables in your model which contribute most towards the probability of a lead getting converted?

Ans. The top variables that contributed in the result are:

- \*What is your current occupation\_unemployed

- \*Total Time Spent on Website

- \*Total Visits

2. What are the top 3 categorical/dummy variables in the model which should be focused

the most on in order to increase the probability of lead conversion?

Ans.: Top 3 categorical/dummy variables in the model which should be focused to

increase the probability are:

- \*Lead Origin with element lead add form.

- \*Last Activity with element SMS sent.

- \*Lead Source with element Olark chat.

3. X Education has a period of 2 months every year during which they hire some interns.

The sales team, in particular, has around 10 interns allotted to them. So during this

phase, they wish to make the lead conversion more aggressive. So they want almost all

of the potential leads (i.e. the customers who have been predicted as 1 by the model) to

be converted and hence, want to make phone calls to as much of such people as

possible. Suggest a good strategy they should employ at this stage.

Ans. : Phone calls must be done if :

- \*They spend a lot of time in the website and this can be done by making

the website more interesting and thus bringing them back to the website.

- \*They are seen coming back to the website repeatedly.

- \*Their last activity is through SMS or Olark Chat conversation.

- \*They are either unemployed or working professionals.

4. Similarly, at times, the company reaches its target for a quarter before the deadline.

During this time, the company wants the sales team to focus on some new work as well.

So during this time, the company's aim is to not make phone calls unless it's extremely

necessary, i.e. they want to minimize the rate of useless phone calls.

Suggest a strategy

they should employ at this stage.

Ans.: In this condition they need to focus more on other methods like SMS or automated

e-mails. This way calling won't be required unless it is an emergency.

The above

strategy can be used but with those customers that have a very high chance of buying

the course.
